Executive Profile

Brett Beemer is a partner in the Orlando office of SeatonHill. For over 17 years Brett has served a diverse client set where he developed finance teams, maintained procedural excellence, and drove profitability. In addition to for-profit organizations, Brett has extensive experience with not-for-profit businesses, helping them to establish proper legal and organizational structure to ensure long term, scalable success.

Our partners have deep experience across multiple industries, and can quickly integrate into your organization to provide the insights you need to succeed in today's marketplace.

Brett Beemer
Partner

Key Experience

League of Southwestern Credit Unions: As CFO Brett facilitated a merger with the 2nd largest credit union in the market, resulting in a combined asset value of \$120 billion. In close collaboration with the board of directors and executive leadership, he restructured reserve and investment policy, developed long range financial strategies, and led the integration of the HR and IT departments in compliance with new company standards.

Mintec: As Global CFO and Head of HR Brett established enterprise accounting practices and regionalized global finance operations. He oversaw the company's migration to the Hyperion financial platform, developed corporate-wide SaaS processes, and instituted policy and procedure changes that resulted in IFRS compliance with revenue recognition. Brett's diligent focus on overall company value increased Mintec's acquisition price by 50%, enabling the company to garner \$60 million over original expectations.

Kairos Prison Ministry International: As Head of Financial Operations for this global non-profit organization with 2,000 FTE volunteers, Brett structured corporate governance, ensured regulatory compliance, and established financial reporting for over 150 global entities.

Al Tazaj: As CFO for the first national fast-food chain in the Middle East, Brett established the restaurant's first network-based infrastructure that connected over 60 international locations. The integration of IT functions helped establish much needed accounting procedures that resulted in significant cost savings and increased profitability.
